Choosing the right tissue

Virgin / pure pulp vs recycled

Pulp made from fresh wood fibre is typically softer, brighter and more absorbent. Recycled fibre is an economical choice for back-of-house use.

1-ply vs 2-ply

Two layers trap more liquid and feel softer - ideal for guest washrooms. 1-ply suits high-volume wiping at lower cost per use.

Why use dispensers

Enclosed, one-sheet-at-a-time dispensing reduces touch contact and waste. Centre-pull suits kitchens and clinics; autocut and folded towels suit washrooms.
